LEAD CYBERSECURITY SPECIALIST • APPLICATION SECURITY • VAPT • SECURITY OPERATIONS

Cybersecurity professional with hands-on experience across security operations, application security, vulnerability assessment and penetration testing, and enterprise cybersecurity solution delivery. Experienced in leading client-facing security engagements, monitoring and responding to threats, conducting VAPT, coordinating remediation, and supporting incident response and compliance. Skilled in PAM, IAM, Microsoft Intune MDM, SIEM, vulnerability management, endpoint and network security, vendor coordination, OWASP-based testing, log analysis and risk assessment.

CORE SKILLS

Security: Web, API and mobile security; VAPT; threat hunting; incident response; vulnerability management; risk assessment; OSINT; MITRE ATT&CK.
Platforms & tools: Splunk, ELK, Wazuh, Microsoft Sentinel, Tenable/Nessus, OpenVAS, Burp Suite, OWASP ZAP, Wireshark, MobSF, Postman, Docker.
Enterprise: PAM, IAM, Microsoft Intune MDM, endpoint security, firewalls, IDS/IPS, VPNs, SIEM, vendor and client engagement.
Scripting: Python, PowerShell, Bash. **Frameworks:** OWASP, NIST, SANS, ISO/IEC 27001.

PROFESSIONAL EXPERIENCE

Lead Cybersecurity Specialist

DataPulse Technologies · Nigeria | March 2026 – Present

• Lead cybersecurity activities across threat and vulnerability monitoring, security controls, risk reduction and incident-response support.

• Plan and conduct VAPT for client web applications, APIs, networks and infrastructure; document findings, recommend remediation and support retesting.

• Coordinate enterprise security solution delivery across PAM, IAM, Microsoft Intune MDM, SIEM, vulnerability management, endpoint and network security.

• Manage vendor and partner engagements involving Microsoft, Tenable/Nessus, Broadcom/Symantec, Veeam, Cisco, OpenText and SolarWinds; prepare technical reports and stakeholder updates.

Application Security Engineer

Vendetta Security · Remote | February 2026

• Performed web and mobile application security testing in fintech environments using manual and automated techniques aligned with OWASP.

• Validated remediation through VAPT retesting, threat modelling and secure design reviews; supported secure SDLC practices and internal testing research.

Corps Member

National Youth Service Corps · Nigeria Immigration Service HQ, Abuja | January 2025 – January 2026

• Supported verification of financial records and recipient identities while protecting data integrity and confidentiality.

• Promoted staff awareness of password security and information-security practices.

Cybersecurity Intern

CYBLACK · Remote | January 2025 – April 2025

• Completed practical training in cloud security, ethical hacking, VAPT, threat intelligence, SOC operations, incident response and GRC.

SOC Analyst Intern

Cyber & Forensics Security Solutions (CFSS) | August 2024 – September 2024

• Used OSQuery, Sysmon, Splunk and ELK for log analysis and anomaly detection; analysed network traffic with Wireshark.

• Configured SIEM monitoring and alerts, supported a ransomware response simulation using TheHive, and performed OpenVAS vulnerability scanning.

SOC Analyst

CyberSafe Foundation · CyberGirls Fellowship | November 2023 – December 2024

• Developed practical capability in SOC operations, SIEM, incident response, threat intelligence, forensics and Level I blue-team techniques.

IT Intern

Petroleum Technology Development Fund (PTDF) · Remote | March 2023 – September 2023

• Supported IT troubleshooting, configuration, networking, device readiness and technical operations.

SELECTED PROJECTS

Insider Threat Detection & Response: Designed a Splunk-based monitoring and response approach incorporating machine-learning techniques for user behaviour analytics; developed an incident-response framework for private healthcare environments.
API Threat Hunting Lab: Hands-on API security lab exploring authentication, authorisation and API abuse patterns using intentionally vulnerable applications and OWASP API security guidance.
PAM Policy — ISO/IEC 27001 aligned: Defined access provisioning, least privilege, session monitoring, periodic access reviews and privileged-account audit controls.
Threat Monitoring & Log Analysis: Built a practical ELK/Filebeat/Kibana environment for centralised log collection and investigation.
Accessibility Assessment: Evaluated digital interfaces for accessibility and usability issues and documented recommendations aligned with WCAG principles.

CERTIFICATIONS

APIsec Certified Practitioner (ACP) • Blue Team Level 1 (BTL1) • Certified Application Security Practitioner (CAP) • Certified Network Security Practitioner (CNSP) • Certified API Security Analyst (CASA) • Certified Blue Team Practitioner (CBTP) • eLearnSecurity Junior Penetration Tester (eJPTv2) • Microsoft Security Operations Analyst (SC-200) • SOC Analyst Level 1 (SAL1)

EDUCATION

M.Sc. Cybersecurity — Nigerian Defence Academy (in progress, 2026)
B.Sc. Cybersecurity — Bayero University Kano, Nigeria (July 2024)

MENTORSHIP & COMMUNITY

Tech Diversity Foundation Program 5.0: Cybersecurity Mentor (May 2025 – Present) • **Jobberman:** Cybersecurity Mentor (August – October 2025) • **Diary of Hackers:** Cybersecurity Awareness Volunteer (July 2024)
